

My first XML Page

My Web host does not support XML. Therefore I decide to post the result and code as a PDF file.

Here is the XML code:

```
<?xml version="1.0"?>
<?xml-stylesheet type="text/css" href="wick_xml.css" ?>
<!-- well-formed, unfortunately! root element
only pieces of stuff allowed outside the root element
are comments and processing instructions
every element must have a closing tag -->
<software>
<!-- ruler to separate from ad banner -->
<hr size="2" width="100%"/>
<main_heading>XML for the Web</main_heading>
<introduction>This is my first XML page</introduction>
<description>
XML: Extensible Markup Language
</description>
```

<description>

Based on the same parent technology as Hyper Text Markup Language

</description>

<description>

Its designed to better handle the task of managing information
that the growth of the internet now requires

</description>

<footer>

Site Design by Wick Gankanda

</footer>

Here is the Style Sheet for the above XML page:

```
main_heading {
    color: red;
    font-family: Arial, Helvetica, Geneva, Swiss, SunSans-Regular;
    font-weight: bold;
    font-size: 38;
    position: center;
    display: block;
    margin-top: 6px;
    margin-bottom: 6px;
    text-align: center;
    padding : 20;
}
```

```
introduction {
    background: #C6FFFF;
    font-size: larger;
    margin-left: 10%;
    margin-right: 10px;
    text-align: justify;
    text-indent : 40;
    display: block;
    margin : 9px 9px 9;
}
```

```
description {
    background-color: #CCFF99;
    font-family: sans-serif;
    letter-spacing: 1px;
    text-align: left;
    display : block;
    margin : 5px 5px;
}
```

```
picture {
    background-image : url(images/lion03.gif);
    width : 70px;
    height : 30px;
}
```

```
footer {
    color: red;
    font-family: Arial, Helvetica, Geneva, Swiss, SunSans-Regular;
    font-size: 60%;
    position: left;
    padding : 50 50;
}
```
